We have a full technical, support, and fibre team that is available to our clients 24/7/365.

## **Home Internet:**

We have recently launched a home internet service called Nagar Internet Service. We are working together to make the internet service more smooth and accessible to all. You can find the most affordable prices and fastest Wi-Fi speeds for your home address.

## **Data Service:**

We enhance data services to our clients, including data management, data storage, and analytics. We assist our clients in making the most strategic and efficient use of their data.

Using both EoIP and MPLS topology we are providing Secured most Data ConneCtivity ServiCes to many Corporate Houses in the Country including

Universities, Garments manufacturers. Pharmaceutical Companies, Shipping Companies, Insurance Companies, FinanCial institutes and many more.

To meet the requirements of interoffiCe data COmmuniCation of different types of corporate houses, who have several operation centres within the city or nationwide

i.e. Banks, NGOs, Multinational companies Pharmaceuticals etc., Weblink Communications Ltd. has developed a strong Metropolitan Network by using

Fiber Optic and Radio backhaul, ensuring redundant by iBGP over OSPF topology among all its pops. Weblink Communications Ltd. has designed the network to Manage data range up to Gigabits.

## **Network Solutions & Maintenance:**

Networking is everywhere, from mobile phones to messages or video games to internet services. Networking is an important part of your life, no matter how you define it. Get on our super-fast networking service today.

We are providing the best Network Solutions services including Routing and Switching, Wireless and Mobility, Data Centre Networking, Performance Optimization, Support, Maintenance and Outsourcing, Local Area Network, Wide Area Networks, Integration of Local Area Networking Solution, Structured Cabling, Wireless LAN, Virtual Private LAN Service ( VPLS), Wide Area Networking Solutions.

## **CCTV & IP Camera Surveillance Solution:**

We have extensive experience in the design, installation, and maintenance of standard as well as custom Video and Audio Security Surveillance CCTV and IP based Systems. We will assess your current situation and concerns, meet with you at your location, and present you with options and solutions that are tailored to your specific security requirements.

**Our Installation service includes:**

Installation of cameras, as well as the installation of all necessary cabling and wiring both inside and outside the location. Install your DVR/NVR System(s) and monitor(s) at the designated location. Connect your DVR/NVR System to the Internet or your company's network. Provide authorized individuals with necessary training.

**IP Telephony Service:**

You can use our IP telephony (Internet Protocol telephony) Service for voice calling, voicemail, video calling, video conferencing, faxing, and instant messaging (IM) at a low cost.

We provide a budget-friendly IP Telephony service with the ability to convert from IP phone to VoIP with simple installation by boosting the cell by continuing to increase communication with the customer without the hassle of a cable.

**Web Solution:** Our Major Web Solution Services are Static & Dynamic Web Creation, C- Panel Web Hosting and Domain Registration, Dedicated Spam Mail Filter.

**Static & Dynamic Web Creation :** A static website is one with consistent content, in which every user sees the same thing on every page. A dynamic website, on the other hand, is one where content is pulled in real time, allowing it to change with the user.

Our skilled Web developers create static and dynamic websites based on the needs of our clients. We have already completed Static & Dynamic Web Creation for a number of clients both in the country and abroad.

### **C- Panel Web Hosting and Domain Registration:**

Weblink Communications Ltd. is Bangladesh's leading Web Hosting Company. We provide the best domain-hosting package as well as a complete package including Web Admin Panel (cPanel), Data Transfer, Email Accounts, DataBase unit as per your need, Park Domain & Sub Domain, FTP Accounts, WordPress Optimization etc

Our control panel has been designed to be simple to use for the benefit of our customers. For any issue, our support team is available 24/7/375.

### **Dedicated Spam Mail Filter :**

A spam filter is a program that detects unsolicited, unwanted, and virus-infected emails and prevents them from reaching the inbox of a user. A spam filter, like other types of filtering programs, looks for specific criteria on which to base its decisions.

For detecting and preventing spam from reaching email users, each spam filter uses a different method. The key to our solution is customizing filters for each client from the start. Rather than having a single set of filtering rules for all clients, regardless of their industries or locations.

## **BPO/ Call Center Service:**

For you, our BPO/Call Center service is the best option. If you don't have enough people, resources, or skills to handle customer service. Our [BPO (Business Process Outsourcing)] service is much more than a call centre. It's a one-stop-shop for all your telemarketing requirements.

We have highly skilled staff who can better understand your company's needs. Both onshore and offshore, our call center and BPO services would be used. We value world-class quality services and customer satisfaction. Our service assists you in increasing your telesales while also allowing you to remain competitive in the industry.

Our Inbound BPO call center services are Support questions, Order processing, and Dispatch.

Our Outbound BPO call center services are Telemarketing, Telesales, and Market research.

## **VPN Solution:**

Without the internet, nothing is possible today. All of our work must now be completed online. Despite the fact that the Internet has made everything easier, our privacy has been called into question in many instances. No matter how big or small your company is, our VPN solution is one of the best ways to keep your internet safe and worry-free.

**Our VPN Solutions will help you to,**

- Hide your identity and location on the internet.
- You can use the internet in a secure and anonymous way.

- Keep unwanted snoopers out of your connection.
- Preventing Imposters from Stealing Your Data and Preventing Data Theft.

### **Software Development:**

We have highly qualified programmers, software engineers, and software developers as professionals. With custom software development skills, we provide System software, Programming software, and Application software. Some of the software that we already have include ISP CRM Software, Billing Software, POS Software, Task Management Software, Education Management Software, Hospital Management Software, and Inventory Management Software.
